## Thermocouple Ribbon

## Thermocouple Strip

Available sizes include widths from .051 to 4.00 inches,  
and thicknesses from .0063 to .064 inches.

## Ribbon & Strip Alloys

TYPE J	iron & constantan
TYPE K	nickel chromium & nickel aluminum
TYPE T	oxygen-free copper & constantan
TYPE E	nickel chromium & constantan
TYPE N	Nicrosil & Nisil
TYPE RNX/SNX	copper nickel manganese
TYPE BPX	copper manganese

ISO 9001  
CERTIFIED

## Ribbon & Strip

**Thermo Conductor Services** supplies thermocouple ribbon and strip, which is used to make connectors for thermocouple assemblies.

By only accepting material from our suppliers that meets our stringent standards, we provide the highest quality thermocouple ribbon and strip in both extension and thermocouple grades.

We also provide nickel-based resistance ribbon and strip, such as nickel-chrome 80, nickel-chrome 60 and nickel 200.

Customers can place blanket orders, so their inventory is on our floor and ready for shipment when it's needed on theirs.
